*Allowable Subject Matter*

1. Claims 1-23 are allowed.

Independent claim 1 recites an apparatus for a firearm sight including "...a sensing section for detecting a physical movement of said firearm sight which is characteristic of a physical impact associated with a cartridge striking mechanism..." which is a feature that is not anticipated nor obvious over the art of record. Independent claim 12 recites an apparatus comprising "...a sight having a viewing section and having a port through which a digital reticle can be introduced electronically into said viewing section from externally of said sight, said viewing section permitting a user to view an image of a scene in association with a digital reticle received through said port..." which is a feature that is not anticipated nor obvious over the art of record. Independent claim 15 recites an apparatus for a firearm sight "...a display on which said viewing section presents said sequence of digital images, said display being visible to a user and having a resolution which is less than a resolution of said image detector; and a digital zoom portion which can digitally change an effective size of said digital images as presented on said display..." which is a feature that is not anticipated nor obvious over the art of record.

Independent claim 16 recites an apparatus comprising "...a sensing portion for detecting movement of said viewing section which has a component approximately transverse to a line extending from said scene to said viewing section; and a further section for providing the user with information based on said movement of said viewing section detected by said sensing portion..." which is a feature that is not anticipated nor obvious over the art of record.

Independent claim 21 recites a firearm sight including "...a reticle adjustment portion which facilitates digital adjustment of the position of said reticle relative to said image, said reticle
